I am a passionate and versatile programmer in my daily life. I am a quick learner and have a self-learning attitude. I enjoy learning and exploring technologies and am passionate about problem-solving. Consistency is my backbone. My current stack include React, Nextjs, MongoDB, Java ,etc. Currently I'm seeking for an internship.

Education

Bachelor of Technology (B.Tech) *Information technology*	**IMS Engineering College, Ghaziabad**(2022 – 2026)
Class 12th *Science Stream* **St. Joseph's Academy**(2022)	
Class 10th **St. Joseph's Academy** (2020)	

TECHNICAL SKILLS

- ★ **Back-End**: NodeJS, Express, NestJS, NextJS, Javascript.
- ★ **Front-End**: React, Redux, NextJS, Bootstrap, Tailwind CSS.
- ★ **Database**: MongoDB.
- ★ **DSA**: Java.
- ★ **Tools**: Postman, Figma, Netlify, VS Code, Open AI, Github, Firebase, Gitlab, etc.

PROJECTS

1- Food Delivery Website

I built a food ordering website with MERN stack. I worked as a full-stack developer to develop API and design UI.

- ❖ Developed API using Express, and NodeJs, which communicates with MongoDB via Mongoose.
- ❖ Designed and developed UI using React, TailwindCSS, and other necessary npm libraries.
- ❖ Implemented role-based auth and integrated payment with Stripe.

Tools Used: Express, NodeJs, Stripe, React, MongoDB , Mongoose and many more.

2- Real-time Chat (under construction)

I'm working on a real time chat website in which different users can chat with each other.

- ❖ Designing using React.
- ❖ Using firebase for storage.

Tools Used: Express, NodeJs, Firebase , React, and many more.

SOFT SKILLS

I prioritize communication, teamwork, creativity, empathy, accountability, patience, confidence, collaboration, and time management.
